

**Industry creates,  
Covertec protects**

**Covertec produces every type of protective film for industrial products, fully respecting nature thanks to the exclusive use of water based procedures.**

**Covertec is operated by a team of experienced professionals and technicians with an extensive knowledge and background in the adhesive and protective film industry.**

Covertec is situated in the industrial town of Sessa Aurunca (ITALY), and consists of

40,000 sqm of land divided into administrative offices, laboratories, production and storage of finished products and raw materials and an area dedicated to the regeneration of trees and plantation.

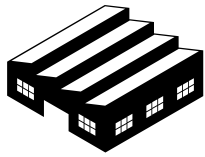

Covertec is certificated according to the Quality standard UNI EN ISO 9001: 2008.

Furthermore the company has abandoned the traditional production process based upon chemical solvents and uses WATER BASED products only and has subsequently obtained the Environmental certification: UNI EN ISO 14001.

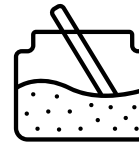

**The design, the colour  
and the final touch are all  
important elements for a  
product success.**

# THE PRODUCTION LINE

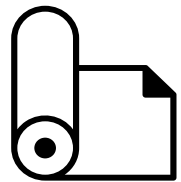

## Department of production

with 3 Coating Plants 2600mm width, with the possibility of two colours printing

## Blend Room

For the preparation of the adhesives

## Cuts, Rewind and Packaging Department

with 4 slitting and 3 rewinding machines

## Research and Development

Laboratories under ASTM and AFERA standards

# PROTECTIVE FILMS

## Removable Protective film, a tool to protect & preserve

Despite being very thin films they can protect the most delicate surfaces from damages. Think of all the wastage due to scratches, or the expensive polished finish to your surfaces.

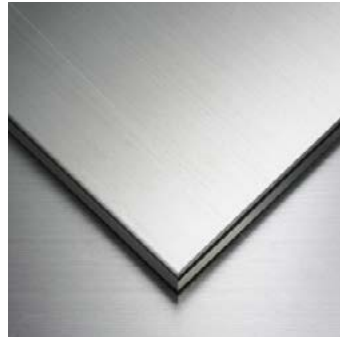

We are all aware of the protective coloured films that are applied to protect T.V. screens, new household appliances or kitchen surfaces.

Despite being very thin films they can protect the most delicate surfaces from damages. Think of all the wastage due to scratches, or the expensive polished finish to your surfaces.

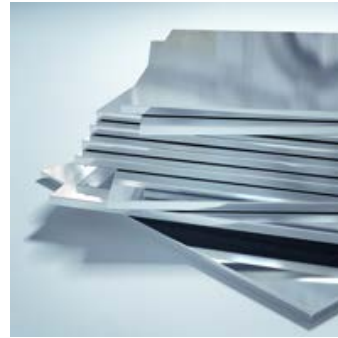

COVERTEC's film will help you reduce your costs while keeping your finished products at their best. The extraordinary characteristic of our films is the ability to stick perfectly to the surfaces you need to protect throughout the production process (drawing, bending, profiling, cutting, laser cutting, post-forming). Our product can be easily discarded by simply peeling it off, leaving you with a perfect surface ready to use. In present society where the design, the colour and the final touch are all important elements for a product success.

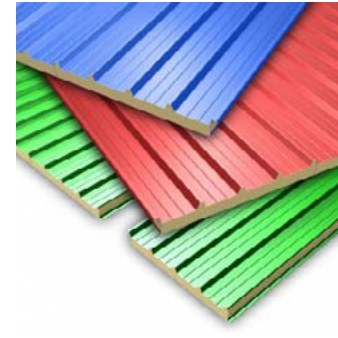

**Protective films for pre-painted metals**

**Protective films for stainless steel surfaces**

**Protective films for aluminum surfaces**

**Protective films for sandwich panels**

**Protective films for decorative laminates**

**Protective films for carpets**

**Protective film for plastic sheets**

**Protective films for glass**

**Protection films for the automotive industry**

**Other applications**

# SUSTAINABILITY

All Covertec protective films are manufactured 100% with solar power and water based adhesives with total respect to the environment

Manufactured 100% with solar power

Water based adhesives

Total respect to the environment

## Superior Style comes from water

COVERTEC is the only company in the field that manufacture 100% their adhesives and protective films water base, powered by solar cells system, this way the emission of toxic substances in the atmosphere is reduced to the simple water vapor, guaranteeing the well-being of the workers and endusers.

This has been possible thanks to a strong investment of resources in the research & development, allowing us to manufacture a high quality adhesives and protective films with excellent technical properties and at the same time totally environment friendly.

**Therefore less reactions and zero pollution: the true power of COVERTEC technology**

**Lead Time:**

All our orders are  
dispatched within 4 weeks

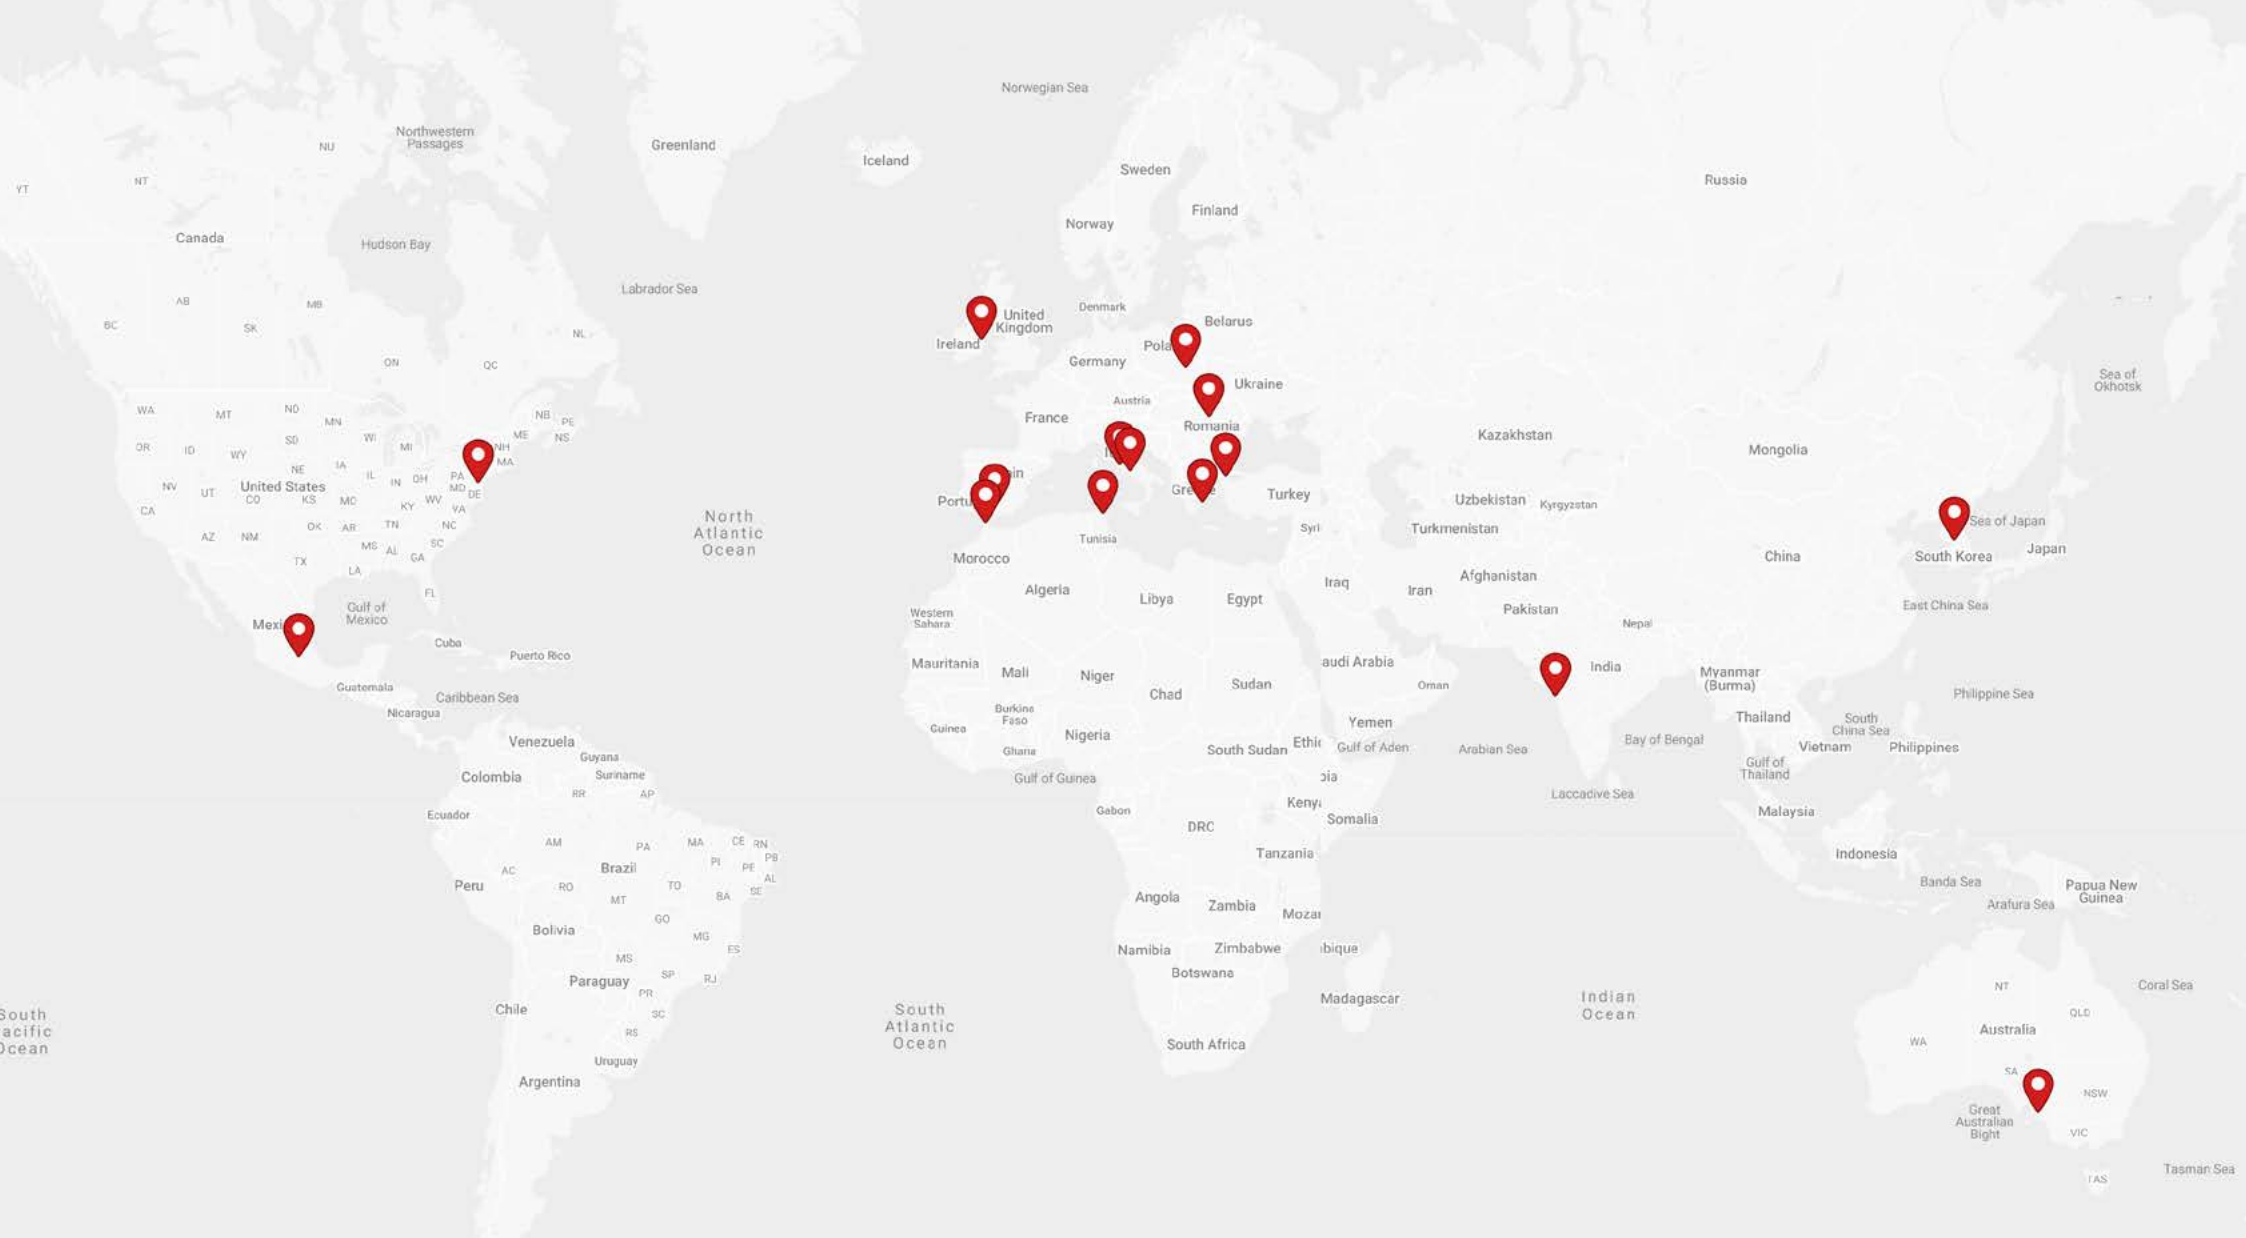

**Flexibility:**

we are able develop new  
products according to the  
needs of our customers like  
a tailored suit

**Technical assistance:**

We provide technical  
assistance during and after  
the use of our products
